

# RE-ENERGIZE

Empowering the Green Transition  
in Renewable Energy

## The Project

Re-Energize is a collaborative European project funded under the LIFE Programme, the EU's flagship funding initiative for environment and climate action. Our mission is to bridge the skills gap in the renewable heating and cooling sectors, with a special focus on heat pump technologies.

Through a set of strategic actions, we aim to boost energy efficiency, promote public engagement, and encourage the installation of sustainable technologies across various European regions.

The project will enhance professional competencies, foster collaboration among stakeholders, and support the EU's green energy goals.

## Launch of the Re-Energize Online Learning Platform

The Re-Energize consortium is pleased to announce the development of the project's Online Learning Environment, a dedicated digital platform designed to host the project's educational materials and support accessible, flexible, and engaging learning experiences across Europe.

The platform is designed for easy access via desktop, tablet, and smartphone devices and will provide structured learning pathways, practical resources, quizzes, and assessment tools for both professionals and consumers.

<https://platform.re-energize.eu>

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them.

# Gamified Learning for Professionals and Consumers

To enhance user engagement and learning effectiveness, the platform integrates a series of interactive and gamified educational tools.

Users will be divided into two categories:

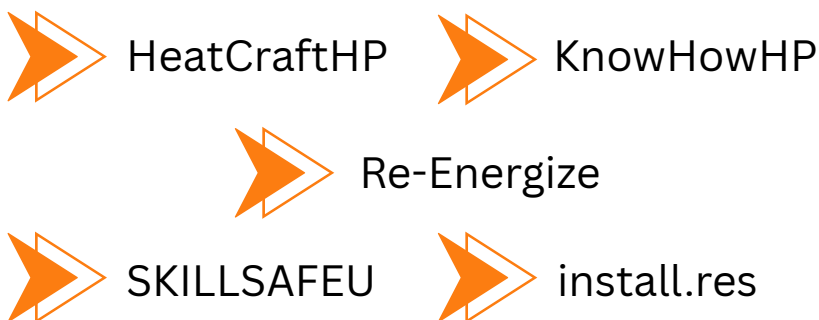

- **Professionals**, participating directly in the project activities
- **Consumers**, including householders and businesses interested in energy efficiency solutions

## Next Phase: Training Activities

The launch of the online platform marks an important milestone for the project and prepares the ground for the upcoming implementation of training activities and capacity-building sessions across participating countries.

## Re-Energize Joins the SKILLS4HP Cluster

Re-Energize is also proud to participate in the new SKILLS4HP Cluster, an initiative bringing together five EU-funded projects under the LIFE Programme:
